Student's declaration on the use of artificial intelligence i preparing written essays and thesis work

Name of the student

Family name: Shaa Prombo

First name: Esdras

Matriculation number: 8118095

Title for essay or thesis

Political Discourse on and Economic Impact of Migration:
An Empirical Analysis

Chatbots using Large Language Models based on artificial intelligence (AI) such as OpenAI's ChatGPT or SchulKI, or Google's Bard have become easily accessible tools to support the academic writing process. Grading your work requires an assessment of what has been your own input to your text and how such models helped you. Please therefore complete and sign the following statements by ticking the boxes and add detail if applicable. Thank you!

Please mark as applicable:

☐ I have not used any Al tool in preparing this text

☒ I used an Al tool in the following areas (multiple answers possible):

- ☒ Finding ideas, stimulating my creativity
- ☒ Understanding concepts, researching facts and definitions
- ☒ Optimising a text that I drafted myself
- ☐ Creating entire text passages following my prompts

If you used an AI tool, please explain which parts of your text have benefitted from the tool and how Feel free to add an extra page if necessary, or provide hyperlinks to chat interactions you used.

I use AI in every part of my work—primarily to polish the language of my original texts and to support coding in Python, R, and MATLAB.
